Paystation CPE Lite

The Next Generation in Cheque Issuing Software

Paystation Cheque Payment Enterprise Lite version (CPE Lite) is the latest in 64-bit technology for secure cheque issuing. This robust application can be utilized with either SQL (Sequel) or Access databases and offers a variety of security enhancements that sees it leap ahead of its competition.

As an add-on enhancement to enterprise-level financial applications, this cheque issuing software handles a variety of currencies, user and account configurations and gives you productivity gains like printing one cheque batch to multiple printers as well as over flow, copies and report pages to a second plain paper source. Encrypted signatures and authorizations are supported to handle the most rigid of cheque issuing best practices and banking requirements.

Unparalleled Features, Security and Control

- Many companies waste hundreds of hours per year having signing officers manually review and sign each cheque that is printed. This time-consuming task can be eliminated with the addition of encrypted signatures. User permissions, signing limits and various authorization scenarios combine to provide the most secure and flexible signing options in the industry
- Jane Doe John Smith*
- Customizing your blank cheques to reflect your corporate identity can be done by adding a company logo to your cheque style. Blank cheque stock and logos enable companies the flexibility of instantly adding or modifying accounts while realizing the cost-savings of printing customized cheques on demand
 - Proprietary 3-in-1 image that details the amount plus the Payee in the exclusive Paystation font deter alteration attempts and entitles the company to a \$150,000.00 Certificate of Warranty to protect against fraud losses
 - User tracking, Multi-level administrative controls including stringent password parameters, encrypted signatures and cheque file encryption help prevent unauthorized cheques

Added Productivity and Efficiencies

- A variety of Audit reports provide detailed payment information. Payment Listings can be exported into file formats such as CSV, Excel, PDF for maximum flexibility and versatility
- Multiple currency*, account and companies can be handled within this one application. (*Any International currency)
- Companies who wish to maintain pre-printed stock can also be accommodated with this flexible software
- CPA (Canadian Payments Association) New Cheque Standards are incorporated for full compliance to Canadian Banking Standards
- Full control and flexibility in determining printer load and balance to efficiently control paper consumption use, including the option to direct overflow and copies to a plain paper printer

Working with Canadian banks, businesses and various law enforcement agencies to help prevent and investigate cheque fraud since 1955, Paystation offers a comprehensive product line designed to safeguard companies' information and financial assets. With the ever-increasing sophistication and evolving forms of fraud, identity theft and corporate risk on the rise, Paystation continues as the trusted leader with our complete line of security products for businesses, governments and financial institutions.
