Compatibility Statement

The Paystation CPS 2.4 (Cheque Payment Software) has been designed to work with Windows®-based accounting and financial applications.

There are numerous possible combinations for today's PC of hardware configurations and software applications from a variety of sources that make it difficult to test and certify a new software application for every possibility. This product has been vigorously tested in a variety of environments. We ask you to bring any errors to our attention so that we may try to resolve them for you quickly.
