

## Centrum Gateway™

Connectors for Straight Through Image Processing™

**VSoft's Centrum Gateway™** connects your distributed capture network with your central processing operation to give you Straight Through Image Processing™. Targeted applications for Branch, Merchant, ATM and Home/Office points of presentment collect, monitor, and perform virtual sorting for branch capture, merchant capture, image-

capture ATMs, and home or small office capture. Business rules for each type of transaction control the capture, validation, and hand-off to back-office processing.

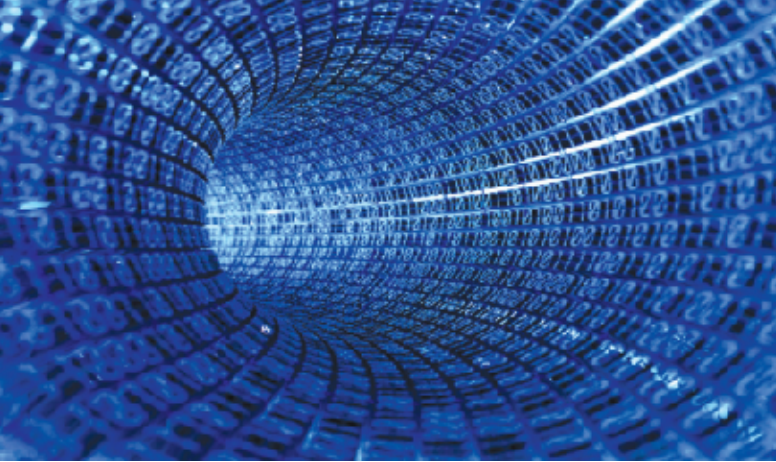

### VSoft Centrum Gateway™

Collectors for your distributed capture network

- Centrum Gateway™ - Branch
- Centrum Gateway™ - Merchant
- Centrum Gateway™ - ATM
- Centrum Gateway™ - Home/Office

**Centrum Gateway™ - Branch** connects to your branch teller and branch back counter points of presentment to provide gateway functions for all image-captured deposits.

**Centrum Gateway™ - Merchant** connects to your merchant customers' low-volume and high-volume points of presentment to provide gateway functions for all image-captured deposits.

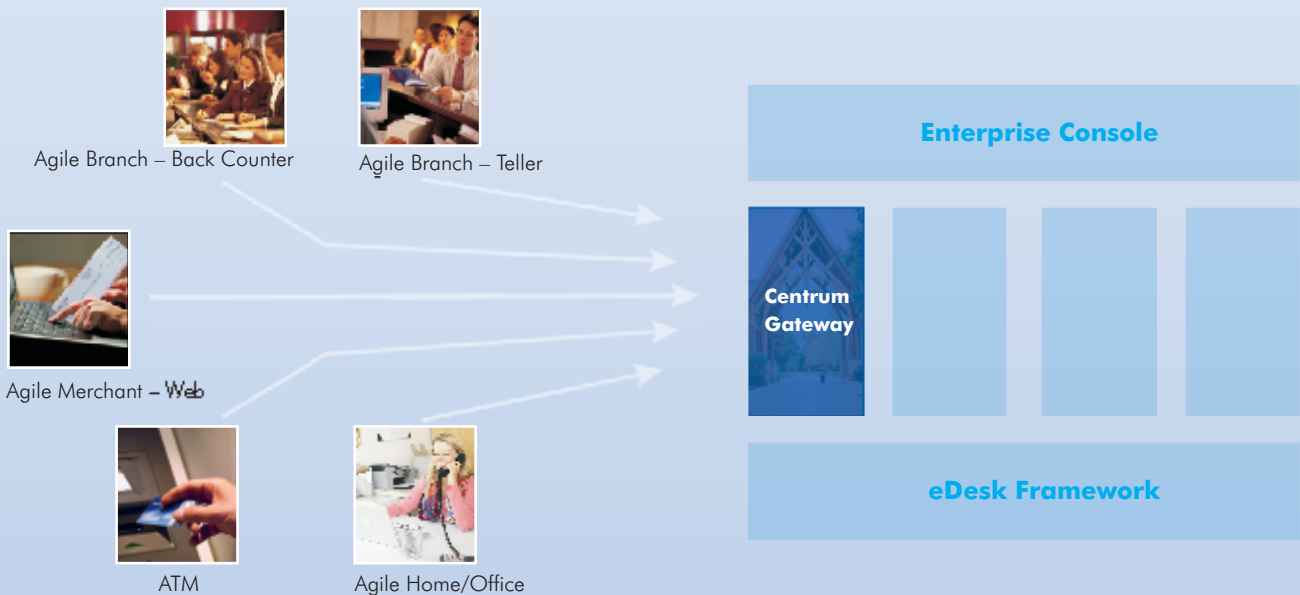

**Centrum Gateway™ - ATM** connects to image-enabled ATMs in your distributed capture network to perform gateway functions for image-captured deposits.

**Centrum Gateway™ - Home/Office** connects to your home and small office customers for low-volume points of presentment to provide gateway functions for image-captured deposits.

**VSoft's innovative Digital Dashboard™** enables financial institutions and multi-institution processors to monitor the distributed capture network to ensure optimal performance and improve cash flow.

## How does it work?

As the lynch-pin in the Straight Through Image Processing™ workflow, Centrum Gateway relies upon a comprehensive set of business rules to control the receipt, processing, and onward transmission of all image-captured items. Your financial institution creates these rules so that your needs are

# CENTRUM

## Centrum Gateway™

met in an automated, controlled, and secure manner. Centrum Gateway is the custodian and distribution agent of your business rules, and it employs them in all gateway functions.

**Ease of Administration** - Centrum Gateway gives you the flexibility to manage your administration from a single platform for varied and multiple points of presentment.

**User Management** - Centrum Gateway allows you to manage the authentication of users from branches, home/small offices and merchant locations.

**Information Display** - Our unique Digital Dashboard displays a comprehensive set of information from all your points of presentment in an easy-to-digest format. This valuable data can be used to evaluate how well the distributed capture network is performing and to determine how operations can be optimized.

**Business Rules** - You can provide consistency between transaction item types, and also fine-tune to the unique needs of your distributed capture locations.

## Benefits

- Provides a similar infrastructure to manage all distributed points of presentment.
- Provides real-time insight into operations, so you can optimize your transaction processing costs.
- Provides processing consistency from all points of capture, throughout your operation, and on to final item resolution.
- Easily expands to add distributed capture branches, merchants, and ATMs.
- Adaptive technology accommodates emerging distributed capture solutions.

- All-day processing:
  - Simplifies end-of-day settlement.
  - Reduces the opportunity for fraud.
  - Accelerates funds availability for you and your customers.
- Document truncation reduces overhead: operations, transportation, and central storage.

## Features

- Branch, Merchant, ATM, and Home/Office connectors address varied points of presentment.
- Supports image, data and electronic cash letters.
- Authentication management of users from branches, home/small office, and merchant locations.
- Digital Dashboard provides the real-time information that managers need to make performance-based and cost-benefit decisions about your distributed processing operation.
- Powerful reporting features generate the summary reports, graphs, and tables as well as the supporting detail.
