Solutions for Deposit and Payment Transactions

The broad VSoft Centrum™ solution line delivers image-based automation efficiencies into your cheque and remittance transaction processing operations. The enhanced flexibility allows for extensive business rules to be implemented for control of every aspect of processing.

This solution suite offers unparalleled options and includes the distributed capture gateway, complete image-based cheque and remittance applications, document imaging and image exchange. It has been designed to help capitalize on our changing technologies and offers time-, labour- and cost-saving efficiencies such as:

- Reduction in the cost of handling, processing and storage of images
- Preserves your capital investment in your desirable legacy systems while enabling them with image- and data-based processing efficiencies
- Automates transaction processing and reduces transaction servicing costs
- Quick and comprehensive deposit and remittance payment transaction research, as well as customer data and item images

OPTIMUM FLEXIBILITY

The VSoft Centrum™ solution suite is based on a shared framework and this provides consistency within the solution set. Through its modular design, you can add applications and exchange endpoints as your business dictates while maintaining the consistent feature set of rules governing user roles, authorizations and other security related infrastructure.

The Enterprise Console allows users to administer, operate and monitor the performance of the various Centrum applications employed. There are a variety that can be utilized to enhance your deposit and payment transactions processing and efficiencies.

EXTENSIVE CENTRUM APPLICATIONS – MODULAR DESIGN FOR MAXIMUM FLEXIBILITY

Centrum IP™ – Image POD

- Full function image proof of deposit capture, correction and balancing

Centrum IP™ - Fraud in Cheque

- Fraud detection using key indicators

Centrum IP™ - Endpoint

- Analyzes value, volume, float and cost

Centrum IP™ - Statements

- Generates paper, email and image statements for flexibility delivery options

Centrum IP™ - SPICE

- Single-pass image capture and encoding reduces operator intervention

Working with Canadian banks, businesses and various law enforcement agencies to help prevent and investigate cheque fraud since 1955, Paystation offers a comprehensive product line designed to safeguard companies' information and financial assets. Paystation continues as the trusted leader with our complete line of cheque imaging products for Canadian Financial Institutions and businesses.
