

EV8626 Currency Counting Machine

The robust EV8626 currency counter is ideal for users who require a highly accurate solution for processing low to medium volumes of banknotes and where ease of use and minimal product training are the key purchase considerations.

If the feed is consistent, count accuracy and banknote authentication are enhanced.

The feed system is the heart of any banknote counter and the **EV8626** incorporates the unique Talaris UltraFeed™ system which maximizes the feed efficiency of the counter, ensuring that it consistently feeds all banknotes regardless of design and quality of condition. Mint, old, damaged, damp, polymer, or banknotes with high intaglio printing are all fed consistently by the **EV8626**.

Mechanical Double-Detection – the most accurate counting system available. Talaris' unique patented Mechanical Double Detection (MDD) system provides superior count accuracy over other systems (up to 100 times more accurate than alternative systems). This unique system accurately counts all banknotes regardless of design and quality of condition, without operator or service technician adjustment.

Unlike opacity counting systems, MDD is unaffected by:

- Currency sets with different densities of paper of different denominations
- Banknotes with excessive levels of dirt or staining
- Clear windows commonly found in polymer notes

Working with Canadian banks, businesses and various law enforcement agencies to help prevent and investigate cheque fraud since 1955, Paystation offers a comprehensive product line designed to safeguard companies' information and financial assets. With the ever-increasing sophistication and evolving forms of fraud, identity theft and corporate risk on the rise, Paystation continues as the trusted leader with our complete line of security products for businesses, financial institutions and governments.

Speed and throughput

With a top speed of 1,500 notes per minute (NPM) the **EV8626** offers the user speed and throughput levels more commonly reserved for the premium models of currency counters. The high-speed, superior feed technology and "right first time" accuracy ensures that users achieve maximum efficiency in their currency processing needs, thereby saving valuable time and money.

Robust, reliable and a great reputation brings a highly robust and reliable product to market

- Metal spine running through the machine
- High-quality moldings
- Full travel keypad with positive action and feel
- High-quality, ergonomic external carry handle
- New and highly durable rubber compounds
- State-of-the-art and highly durable electronics

TECHNICAL DATA	EV8626
Speed range	600 – 1500 notes per minute
Document size range	1.97in x 3.94in to 3.54in x 7.28in
LCD capacity	Count – 5 digits/Batch – 3 digits
Keypad	Full travel keys with specific function keys
Power supply	98V – 264V AC, 50/60 Hz
Mean power rating	150 W
Dimensions HxWxD (inches)	10.43 x 11.81 x 10.35
Weight (lbs)	16.5
The technical data is approximate. Subject to change.
