

Paymaster Cheque Writers \$67.510.320

CPETeller Manages:

- ✓ Client data
- ✓ Layout of all: cheques, deposit credits, re-order and delivery slips using fixed print positions
- ✓ Automatic collation of slips
- ✓ Re-prints under strict control
- ✓ Multiple Currency Designs

CPETeller Eliminates:

- ✗ Poor print quality and cheques rejected at the bank
- ✗ Reliance on out-dated, often bulky technology and the need for technically aware operators
- ✗ High maintenance costs
- ✗ Expensive Running Costs
- ✗ Labour intensive chequebook collating
- ✗ Questions over different currency layout positions

CPETeller produces on-site MICR documents with the ONLY 64-bit technology available

The highly powerful **CPETeller** software from Paystation Inc. provides an easy to use application for financial institutions to print a full range of documents while the customer waits - all in a matter of seconds.

The **CPETeller** software allows authorized users to print the detailed personal information on all documents using pre-set fields to make the whole process very simple.

With an easy to use menu, the teller can quickly create a full range of documents including:

- Money Orders
- Personal Cheque Books
- Business Cheque Books
- Deposit Books/Slips
- Bank Drafts

Plus many more ...

With full user security, the **CPETeller** software has a fully controlled print centre with password control and user sanctions to prevent unauthorized access. It also provides full audit reporting on all activity carried out.

The efficient **CPETeller** software integrates into your host software application to eliminate dual entry of data and can update your existing financial application helping to reduce errors in inputting often made by the Teller.

The software controls the paper trays automatically allowing combinations of MICR cheques, deposit slips and re-order slips to be printed in one pass.

CPETeller is very flexible and can be used at the teller workstation or as a high volume print bureau for centralized production.

Financial institutions are benefitting from increased revenues by cross selling products and services using **CPETeller's** message feature. This allows you to regularly update marketing messages that keep the customer informed of your latest products and services.

Using **CPETeller** provides a cost-effective solution to financial institutions for fast and secure production of the full range of MICR documents. **CPETeller** improves customer service and reduces customer waiting times by creating starter chequebooks for newly opened accounts in branch in a matter of seconds.

CPETeller will also reduce all costs associated with expensive pre-printed documents that often take several weeks to produce.

- Personalize Cheques
- Import client data from existing databases
- Communicate late fees clearly
- Add, delete and modify before printing
- Sequential numbering every time
- Cross sell products and services with key messages

The production process is simple and efficient and meets the MICR layout requirement of the Canadian Payments Association (CPA), American National Standards Institute (ANSI) and the American Bankers Association (ABA).
