

CPE-Cloud

Paystation's CPE-Cloud is a secure payment and cheque production solution designed and built with security in mind. This state of the art cloud based application is highly configurable, fast to deploy and provides a low cost of ownership for all of your cheque printing needs.

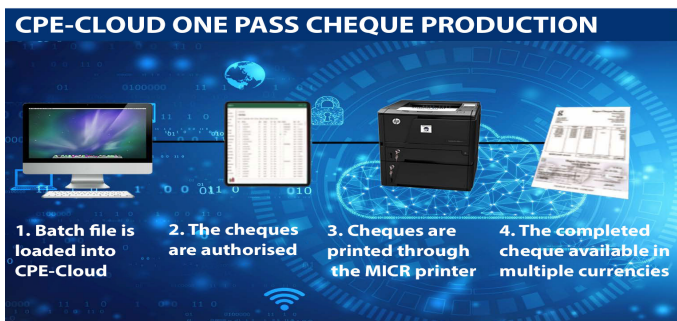

CPE-Cloud streamlines the production of all cheque related documents by integrating directly to your host financial system utilizing a combination of cloud based technology, local components and the very best in MICR laser technology.

CPE-Cloud is a web application hosted on Microsoft Azure utilizing authentication services provided by AuthO, the leader in this field & relied upon by some of the world's largest companies.

All cheques are printed with bank details, corporate and bank logos, currency symbols and signatures in one pass of the printer following strict security protocol that meets bank mandate requirements.

The final result is a professional looking and highly secure cheque document that will be printed in a matter of seconds.

Accessing our cheque production applications has never been easier with the ability to use any desktop, laptop, tablet or even a mobile within your business (user requirements and security settings apply), allowing for remote authorization of cheque batches from anywhere in the world.

Benefits

Reduced IT Costs

CPE-Cloud can reduce the cost of managing and maintaining on-site applications.

Improved Security

CPE-Cloud encrypts all communication to and from the application using HTTPS (SSL/TLS).

Frequent Updates

Under your service contract, updates to the web application will be applied automatically and with limited to no downtime, outage or interruptions. Updates to the print client application will be available to download from the web application as they become available.

Flexibility

CPE-Cloud allows users to view and authorize payment runs on the go from any location.

Disaster Recovery

Introducing cloud based applications to your business saves time, avoids large upfront investment and provides your business with complete peace of mind that your cheque printing is covered should there be a disaster recovery situation.

Easy Access

CPE-Cloud can be accessed from any device with an internet connection and modern compatible web browser including Chrome, Firefox, Safari and Microsoft Edge and gives great flexibility to view and authorize payment runs on the go from any location.
